01 OVERTIME IS THE STRONGEST ATTRITION FACTOR

- Employees working overtime leave at 30.5% vs 10.4%, and account for 54% of all attrition despite being only 28% of the workforce.

Recommendation:

- Cap overtime hours, rebalance workloads and compensate extra hours.

02 THE FIRST 2 YEARS ARE CRITICAL

- Employees with 0-2 years of tenure leave at 29.8% vs 8.1% for 10+ years. Ages 18-25 leave at 35.8%.

Recommendation:

- Strengthen onboarding with mentors and 6-month check-ins, and build early-career growth paths.

03 SALES REPRESENTATIVES ARE HIGHEST RISK

- Attrition is 39.8%, the highest of any role, and average pay is the lowest at $2.6K per month.

Recommendation:

- Review pay and workload for this role and create a targeted retention plan.

04 LOW PAY AND NO STOCK OPTIONS

- Employees who left earned 30% less ($4,787 vs $6,833). Without stock options attrition is 24.4% vs 9.4% at level 1.

Recommendation:

- Benchmark salaries for lower income bands and widen stock option eligibility.

05 TRAVEL AND WORK-LIFE BALANCE

- Frequent travelers leave at 24.9% vs 8.0% for non-travelers. Bad work-life balance reaches 31.3%.

Recommendation:

- Rotate travel assignments and offer flexible work arrangements.

06 SALARY HIKE ALONE IS NOT ENOUGH

- Attrition stays between 14.6% and 17.5% across hike bands, so the annual hike does not separate leavers from stayers.

Recommendation:

- Focus on base pay, workload and growth, not only annual hikes.
